FINAL SUMMARY REPORT FOR GROUP II POTENTIAL RELEASE LOCATIONS (PRLs), ENVIRONMENTAL BASELINE SURVEY, FORMER MARINE CORPS AIR STATION, EL TORO

Dear Mr. Newton:

The Department of Toxic Substances Control (DTSC) has reviewed the subject document dated March 2005, prepared by Earth Tech, Inc. During the 2003 environmental baseline survey, 76 facilities were identified as being associated with a potential release of contaminants to the environment. These facilities were assigned PRL designations followed by the associated building number or association. 17 PRLs were found to have no significant release and concurred upon that no further investigation was required. The remaining 59 PRLs will be addressed in four groups.

Group II summary report presents the results of environmental investigations conducted on 5 PRLs (PRL 51, 310, 370, 445, 923). Records review, visual site inspections, and/or soil sampling were conducted to evaluate whether the release of hazardous substances or pollutants into the environment had occurred. The report recommended no further investigation for these PRLs. Based on our review, DTSC concurs with the recommendations presented in this report. If you have any questions, please contact Mr. Frank Cheng, Remedial Project Manager, at (714) 484-5395.

Sincerely,

Manny Alonzo, Unit Chief
Office of Military Facilities
Southern California Operations Branch
